Hadley Brows Microblading

Hadley Microblading was officially opened in May of 2018 by Cristina Spear. Cristina has been perfecting the technique of microblading since she attended the Chicago PhiBrows Academy in March of 2017 where she became certified. Cristina fell in love with the concept while getting hers done and realized there was not someone in our area to offer the service and decide to open her own business here!

Microblading is a semi-permanent tattoo on the eyebrow that creates realistic hair strokes to make a brow seem fuller, add shape to the brow or create an entire brow if needed. A small handheld tool is used with a high quality pigment to create the look. Cristina uses high quality pigments that do not leave a red trace, are in accordance with ReSap 2018 and are 100% MRI safe. These pigments are also not tested on animals and are vegan safe. Coming soon; eyelash extensions!
